

Carrier Wireless Service Certification (CWSC) program allows carriers and vendors to independently test and certify devices.

The program utilizes WBA Authorised Test Labs, working with Members and their partners to simulate end customer usability in a real network environment to ensure that devices are ready for worldwide commercial deployments, reducing customer support time for carriers and time to market for vendors.

Operators

CWSC allows carriers to test Wi-Fi services end-to-end (from provisioning through to billing) against different equipment and credentials. This removes issues prior to commercial release, ensuring a better customer experience.

Vendors

Avoid multiple testing with different carriers, instead testing multiple devices across multiple carrier networks, gaining time to market. Vendors can also gain interoperability Certification to validate carrier's requirements in order to facilitate sales, and save testing resources.

The Process – How to apply

If you are an Operator

If you are Equipment Vendors

STEP 1
Contact WBA PMO
(pmo@wballiance.com)

STEP 2
Register for the CWS program by submitting the application form

STEP 3
Provide credentials and equipment to the selected WBA lab and test any services end-to-end

STEP 3
Provide equipment to the selected WBA lab and test any services end-to-end

STEP 4
Work with WBA Labs and receive the testing report and act upon it (if required)

STEP 5
Receive the CWS certificate
(for devices and servers only)
